Flac and Filac are two strong, straight-sided display faces. Their creation is a story of *what if*. What if a typeface's weight only increases outward, while the width of its inner shapes remains constant? How does that change the typeface's appearance and personality?

Flac & Filac, diverging typographic melodies

Started as an experiment, Flac has its roots firmly in film marketing: I was interested in diving into the ultra-compressed type often found on old movie posters. The first style I drew was the Thin weight. Initially, it seemed like there weren't many exciting avenues to explore. Expanding the ultra-compressed letterforms to narrow and regular widths didn't generate satisfying results. The next strategy was to add weight to the skeleton of the Thin style. The super-slim counters didn't have much room in them, so they remained unchanged. The only other option was to grow the letterforms outward, which gave the typeface its distinct appearance. This resulted in a surprising succession of weights.

Evolving beyond its original cinematographic influences, Flac found new sources of inspiration in the visual vocabulary of midcentury cool jazz and bossa nova, and the iconic Blue Note Records album sleeves designed by Reid Miles. The project gradually expanded into a type family of many styles.

After hibernating in a bottom drawer for a long time, Flac came back to life a few years ago when it was used for the headline and deck sizes in a newspaper weekend supplement's redesign. Finally, in the summer of 2024, I drew the definitive version of Flac. This new iteration started with a second what if. What if the same Thin style gained weight in the horizontal direction exclusively? The result was Filac, a typeface with a series of weights exhibiting increasingly dramatic contrast between the thin horizontal parts and the ever-expanding vertical stems.

Naming typefaces is one of the most challenging aspects of font production. I used acronyms this time: Flac 30 stands for "Four-Letter Acronym," while Filac 30 is short for "Five-Letter Acronym." The number 30 signifies that the narrowest widths are the first members of a larger coordinated typographic system. Like the time indications on cassette tapes (remember those?), the series will be expanded with wider versions named 45, 60, 90, 120, and so on.

Flac and Filac are two variations on a common theme. They share an almost identical Thin style, with subtle differences that probably very few people will notice. Each family develops a distinct personality as its weight increases. The typefaces feature short ascenders and descenders and straight sides, making them perfect candidates for robust, compact titles and headlines. They can also produce impactful short bursts of text when used in moderation. The typefaces come with a few alternates, allowing you to customize text to your exact specifications.

Both Flac 30 and Filac 30 have petite caps, small caps that are exactly as tall as the x-height. Their height allows them to combine seamlessly with the lowercase letters, another helpful feature for display typography. Activate this feature with a single click thanks to the Unicafe stylistic set.

Use Flac 30 and Filac 30 to create confident and stylish display typography. They feel perfectly at home on posters and (music) packaging, as well as in editorial design and social media posts.

100/96

Naming typefaces is one of the most
challenging aspects of font production.

48

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

36/24

THE NUMBER 30 SIGNIFIES THAT THE
NARROWEST WIDTHS ARE THE FIRST
MEMBERS OF A LARGER COORDINATED
TYPOGRAPHIC SYSTEM.

24/24

Flac and Filac are two variations on a common theme. They share an almost identical Thin style, with subtle differences that probably very few people will notice. Each family develops a distinct personality as its weight increases. The typefaces feature short ascenders and descenders and straight sides, making them perfect candidates for robust, compact titles and headlines. They can also produce impactful short bursts of text when used in moderation. The typefaces come with a few alternates, allowing you to customize text to your exact specifications.

96/80

*One of the trickiest parts of creating
a font is deciding on its name.*

36

Filac stands for “Four-Letter Acronym”, while Filac is short for “Five-Letter Acronym”.

36/24

THE NUMBER 30 SIGNIFIES THAT
THE NARROWEST WIDTHS ARE
THE FIRST MEMBERS OF A LARGER
COORDINATED TYPOGRAPHIC
SYSTEM.

24/24

Built on a shared concept, Filac and Filac begin in near unison, particularly in their Thin weights. But as weight increases, each takes a distinct path, revealing its own typographic attitude. Designed with short ascenders and descenders and firm verticals, they offer compact power in headings and brief text bursts. Optional alternates let you push the design even further.

72/72

Of all the steps in producing a font, naming the typeface is often the most challenging.

36

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

36/24

THE NUMBER 30 SIGNIFIES
THAT THE NARROWEST
WIDTHS ARE THE FIRST
MEMBERS OF A LARGER
COORDINATED TYPOGRAPHIC
SYSTEM.

24/24

Flac and Filac explore the same design idea from slightly different angles. They start with nearly identical Thin styles, differing in subtle ways only the keenest eyes might catch. As the weights grow bolder, each takes on a unique character. With short ascenders, short descenders, and straight verticals, these typefaces excel in tight, punchy titles and headlines. When used sparingly, they can also make short passages of text pop. Built-in alternates allow for precise customization.

72/40

COMING UP WITH NAMES FOR TYPEFACES IS AMONG THE HARDEST PARTS OF MAKING A FONT.

28

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

36/24

THE NUMBER 30
SIGNIFIES THAT
THE NARROWEST
WIDTHS ARE THE
FIRST MEMBERS OF A
LARGER COORDINATED
TYPOGRAPHIC SYSTEM.

24/24

At first glance, Flac and Filac may seem like twins, especially in their Thin weights—virtually indistinguishable except for nuanced details. But as you move up the weight range, each family asserts its own personality. Their compact proportions—short ascenders and descenders, vertical sides—make them ideal for headlines that need to hit hard without taking up space. A handful of alternate characters offer room for fine-tuned typographic expression.

64/64

Font creation involves many challenges, and naming the typeface is high on that list.

24

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

36/24

**THE NUMBER 30
SIGNIFIES THAT
THE NARROWEST
WIDTHS ARE THE
FIRST MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.**

24/24

Flac and Filac are two faces of the same concept. Their Thin styles are so similar that only typographic detectives might notice the differences. But as the weights get heavier, the two fonts begin to diverge, each growing into its own identity. Designed with compactness in mind—thanks to short ascenders, descenders, and straight sides—they’re built for powerful headlines and short-form content. A few stylistic alternates let you tailor your message to perfection.

48/48

One major challenge in the font-making process is finding a suitable name for the typeface.

36/36

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

36/22

**THE NUMBER
30 SIGNIFIES
THAT THE
NARROWEST
WIDTHS ARE
THE FIRST
MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.**

24/24

Flac and Filac begin almost as mirror images—especially in their lightest weights—but gradually branch off into distinct voices as they grow bolder. Their short ascenders and descenders, along with rigid vertical sides, make them exceptionally space-efficient and impactful for headings. They also offer expressive potential in brief text passages. A handful of alternate characters provides added flexibility.

52/52

Naming a typeface is often one of the toughest steps in font development.

32/36

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

24/16

***THE NUMBER 30
SIGNIFIES THAT
THE NARROWEST
WIDTHS ARE THE
FIRST MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.***

24/24

Think of Flac and Filac as design cousins. They share the same DNA, particularly in their Thin styles, where differences are minute. But add some weight, and each takes off in its own direction. With their short vertical extensions and squared-off sides, both families are perfect for tight, strong headlines. They're also effective in short, sharp text blocks. Plus, a modest selection of alternates lets you adjust the vibe to your liking.

48/48

Among the many hurdles in font production, naming the typeface stands out as particularly tough.

24/28

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

24/16

**THE NUMBER 30
SIGNIFIES THAT
THE NARROWEST
WIDTHS ARE THE
FIRST MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.**

24/24

Flac and Filac are like siblings with shared roots. Their Thin styles are nearly identical—only subtle cues separate them. But each evolves differently across the weight spectrum, developing its own flavor. With efficient vertical spacing and straight-sided construction, they shine in titles and short, dynamic text. A few smart alternates provide creative flexibility.

36/36

Choosing the right name for a typeface can be a surprisingly difficult task in font production.

24/28

Flac stands for “Four-Letter Acronym,” while Filac is short for “Five-Letter Acronym.”

24/16

**THE NUMBER
30 SIGNIFIES
THAT THE
NARROWEST
WIDTHS ARE
THE FIRST
MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.**

24/24

Flac and Filac start from the same premise and grow apart gracefully. The Thin weight is almost a match in both, marked by delicate distinctions few will notice. As weights increase, individuality emerges. Their compact design, with short ascenders/descenders and clean verticals, makes them perfect for space-conscious, attention-grabbing headlines. Alternates offer a layer of customization when you need to fine-tune.

36/36

**TYPE DESIGNERS
OFTEN FIND THAT
NAMING A FONT IS
ONE OF THE HARDEST
PARTS OF THE JOB.**

22/24

**Hac stands for “Four-Letter Acronym,”
while Filac is short for “Five-Letter Acronym.”**

24/16

***THE NUMBER
30 SIGNIFIES
THAT THE
NARROWEST
WIDTHS ARE
THE FIRST
MEMBERS
OF A LARGER
COORDINATED
TYPOGRAPHIC
SYSTEM.***

24/24

**Hac and Filac play variations
on a theme—starting out
nearly identical in their
Thin styles, with only faint
nuances between them. As
the weight increases, they
grow apart, each finding a
unique voice. Their short
ascenders and descenders,
paired with straight sides,
make them ideal for bold,
space-saving headlines.
And for that extra touch of
personality, a few alternates
are there to tweak the tone
just right.**
